

Utils

emrPoint2Android

📄 Copy page

▼

Convert an EMR coordinate point to a screen pixel point.

```
static emrPoint2Android(point: Point, pageSize: { width: number; height: num
```

Parameters

Parameter	Type	Description
point		EMR coordinate point
pageSize		Page pixel size

Returns

: converted screen pixel point

Example

```
import { PointUtils, type Point } from 'sn-plugin-lib';

/**
 * Example: convert an EMR point to a pixel point.
 */
export async function exampleEmrPoint2Android() {
  const point: Point = { x: 15819, y: 11864 };
  const pageSize = { width: 1404, height: 1872 };

  return PointUtils.emrPoint2Android(point, pageSize);
}
```
